RETAINER CONTRACT FOR GEOTECHNICAL SERVICES  
STATEWIDE**

**Questions & Answers:**

Q1. Is DOTD requiring prime/team to have the AMRL accreditation for each of the testing procedures listed in the scope of services?

A1. At a minimum the consultant should be accredited by AMRL for the AASHTO standard/test methods for R18, R58, T88, T89, T90, T99, T100, T180, T208, T216, T265, T296, & T297. Accreditation for the analogous ASTM standard/test methods D3750, D421, D422, D4318, D698, D854, D1557, D2166, D2435, D2216, D2850, D4767, & D1140 will be accepted in lieu of the AASHTO method.

Q2. Should a separate submittal be sent for each contract advertisement?

A2. No. Only one DOTD form 24-102 submittal is required for this advertisement, and it represents the Prime Consultant's qualifications and submittal for all referenced contracts. All identifying contract numbers must be listed on the cover page of the submittal.

Q3. In the Retainer Contract for Geotechnical Service, under the ASTM designations, you list D3750. Should this be D3740?

A3. Yes. Please use D3740
